ENGINEERING & MANAGEMENT

JOIN US ON OUR JOURNEY

At AMM Consulting, we invite you to connect with us as we strive to make a difference through engineering and management consulting. Together, we can achieve remarkable outcomes while embracing our values of community and collaboration.

Message from our Management

At AMM Angola, we believe that engineering is more than just building infrastructure — it's about shaping the future of our nation. With deep roots in Angola and a commitment to excellence, we bring together technical expertise, local insight, and international standards to deliver transformative solutions.

From roads that connect communities to systems that power progress, our work reflects our belief that Africa deserves world-class engineering led by Africans. Our mission is to raise the bar for quality, accountability, and innovation in every project we undertake. As we build for today, we're also laying the foundation for a more resilient, prosperous tomorrow.”

ABOUT US

AMM FUTURO LDA is an African-founded engineering and consulting firm dedicated to delivering impactful solutions across the continent. Our team comprises seasoned professionals with extensive experience in project management, construction supervision, engineering design, and installation. We are driven by the spirit of ubuntu, fostering inspirational relationships and personal connections in all our projects.

OUR VISION

01.

Our vision is to be a leader in engineering consulting across Africa, fostering sustainable practices and community development.

02.

To be the benchmark for engineering excellence in Angola and beyond and be the bridge between the communities we serve and those that make the decisions.

OUR MISSION

01.

We aim to enhance lives through innovative engineering solutions and strong partnerships.

02.

We are committed to excellence, integrity, and the empowerment of our workforce as we grow together.

03.

To deliver sustainable and innovative infrastructure solutions through integrity, expertise, and a focus on client success.

OUR HISTORY

AMM Angola's story is rooted in a vision to provide exceptional engineering and infrastructure solutions tailored to Angola's unique development needs. What began as BANT2 — a focused consultancy — has evolved into a trusted national firm. Our journey reflects a commitment to growth, strategic transformation, and excellence in delivery.

2018

– Founding of BANT2 –

BANT2 was established as a consultancy platform focused on civil engineering support, project advisory, and infrastructure development in Angola.

2021

– Operational Growth and Strategic Alignment –

The company expanded its services, deepened its involvement in large-scale public infrastructure projects, and began aligning operations with international engineering standards.

2024

– Rebranding and Evolution –

To reflect its growing capabilities, local roots, and national ambition, BANT2 began the transition to a new identity — AMM Angola.

Present

– AMM Angola – Engineering Excellence in Angola –

Now fully operating as AMM Angola, the company delivers multi-disciplinary engineering and project management services across Angola, committed to quality, sustainability, and leadership in infrastructure development.

SECTORS

Installation & Clean Energy Services

We are leading the way in solar and wind energy implementation and helping communities transition to sustainable energy sources.

Oil & Gas Sector

Oil & Gas continue to be the main driver of world economies. Our team caters to this sector by supplying essential equipment's and services.

Mining & Resources

Together with our partners we facilitate sustainable access to Africa's resources.

Our experts cater to this sector by supplying essential equipment's and services.

SECTORS

Transportation Planning & Traffic Management

Streamlined logistics and transportation solutions that support efficient movement of goods and people.

Consulting and Project Management

Offering strategic insights and professional guidance in engineering and project management.

Construction Supervision and Health & Safety Services

Our experts design and manage engineering projects across various sectors that enhance infrastructure and utility across regions

SERVICES

Procurement and Supply Services

- Supply & Installation of integrated access control, CCTV and Fence alarm systems
- Supply and Operation of Crew Boats
- Offshore Supply Vessels for specialist equipment deliveries
- ROV supply and inspections
- Subsea technologies and specialized services
- High Grade Security Fence & Double Walled Security Fencing
- Sheet pile manufacturing and supply
- Supply of PPE and Equipment's, Corrosion Testing
- Subsea welding, general welding & Painting services incl. NDT testing
- Supply of Valves, Pumps, Pipes, Hoses
- Supply of Fluids, Pipe Fittings & Flanges
- Supply & Installation security lighting

PROJECT MANAGEMENT & ADVISORY

- Project planning
- Financial and budget control
- Programme design and management
- Risk assessment and management
- Stakeholder facilitation and management
- Supply chain management
- Logistics management and project coordination/ delivery

SERVICES

WATER & SANITATION

- Feasibility studies & Road Safety Audits
- Infrastructure Master Plans and Integrated Development Plans
- Flood Hydrology and Rural/Urban Storm water Runoff Modelling
- Planning and Design of Major/Minor Storm water Infrastructure
- Water Demand Management and Loss Control
- Design of Parking Facilities and Access Roads - Bulk Services Planning
- Design of Urban and Rural Residential Townships
- Design of Urban Mixed-Use Developments (Commercial/Recreational/Residential)
- Internal Water and Sewer Reticulation Designs
- Wastewater Treatment Plant Design.

BUILDING & STRUCTURAL ENGINEERING

- Industrial and commercial building design
- Urban Engineering
- Residential building design
- Earth retaining structures
- Bridge and culvert design
- Bridge Management Systems
- Bridge inspections and assessments

SERVICES

Geotechnical Engineering

- Geotechnical investigations & characterizations.
- Pavement evaluation & design.
- Temporary lateral support design.
- Foundation design.
- Ground improvement.
- Dam evaluation & design.
- Waterfront improvements.
- Retaining wall evaluation & design

Transportation Planning & Traffic Management

- Feasibility studies & Road Safety Audits
- Geometric design
- Pavements and Rehabilitation Designs
- Economic evaluation of alternatives
- Contract documentation and management
- Construction monitoring and administration
- Stakeholder consultation
- Operation and maintenance management
- Road traffic safety assessment
- Preparation of Traffic Impact Studies,
- Integrated Transport Plans and Traffic Modelling,
- Design and implementation of Non-Motorized Transport facilities.
