01 WHO WE ARE

WHO WE ARE

AMM FUTURO LDA is an Angolan engineering and consulting firm dedicated to delivering impactful solutions across the continent. Our team comprises seasoned professionals with extensive experience in project management, construction supervision, engineering design, and installation. We are driven by the spirit of ubuntu, fostering inspirational relationships and personal connections in all our projects.

JOIN US ON OUR JOURNEY

At AMM Consulting, we invite you to connect with us as we strive to make a difference through engineering and management consulting. Together, we can achieve remarkable outcomes while embracing our values of community and collaboration.

MESSAGE FROM OUR MANAGEMENT

At AMM Angola, we believe that engineering is more than just building infrastructure — it's about shaping the future of our nation. With deep roots in Angola and a commitment to excellence, we bring together technical expertise, local insight, and international standards to deliver transformative solutions. From roads that connect communities to systems that power progress, our work reflects our belief that Africa deserves world-class engineering led by Africans. Our mission is to raise the bar for quality, accountability, and innovation in every project we undertake. As for today, we're also laying the foundation for a more resilient, prosperous tomorrow."

02 OUR MISSION

OUR MISSION

01

We aim to enhance lives through innovative engineering solutions and strong partnerships.

02

We are committed to excellence, integrity, and the empowerment of our workforce as we grow together.

03

To deliver sustainable and innovative infrastructure solutions through integrity, expertise, and a focus on client success.

03 OUR VISION

OUR VISION

01

Our vision is to be a leader in engineering consulting across Africa, fostering sustainable practices and community development.

02

To be the benchmark for engineering excellence in Angola and beyond and be the bridge between the communities we serve and those that make the decisions.

— 04 SECTORS

SECTORS

01

Installation and Clean Energy Services

We are leading the way in solar and wind energy implementation and helping communities transition to sustainable energy sources.

02

Oil & Gas Sector

Oil & Gas continue to be the main driver of world economies. Our team caters to this sector by supplying essential equipment and services.

03

Mining & Resources

Together with our partners we facilitate sustainable access to Africa's resources. Our experts cater to this sector by supplying essential equipment and services.

— 04 SECTORS

SECTORS

Transportation Planning & Traffic Management

Streamlined logistics and transportation solutions that support efficient movement of goods and people.

Consulting and Project Management

Offering strategic insights and professional guidance in engineering and project management.

Construction Supervision and Health & Safety Services

Our experts design and manage engineering projects across various sectors that enhance infrastructure and utility across regions.

05 SERVICES

Engineering, Consulting Services & Project Management

We deliver integrated engineering and design consulting services across the full project lifecycle, combining project management with multidisciplinary technical expertise. Our capabilities include infrastructure and general engineering design, geotechnical investigations and characterization, foundation and pavement design, ground improvement, and water and sanitation systems including stormwater and wastewater infrastructure.

We support projects through project planning and milestone identification, financial and budget control, programme design and management, risk assessment and mitigation, stakeholder engagement, and supply chain coordination. Our approach ensures practical, efficient, and sustainable solutions tailored to both public and private sector infrastructure developments.

OUR SERVICES INCLUDE

- Roads & Highways Engineering
- Bridges & Structures Engineering
- Geotechnical Engineering
- Water & Sanitation Engineering
- Structural Engineering
- Transportation & Traffic Engineering
- Urban Infrastructure & Development
- Construction & Project Management
- Renewable Energy Engineering
- Mechanical & Electrical (M&E) Engineering
- Stormwater & Drainage Engineering
- Pavement Engineering
- Environmental Engineering

05 SERVICES

Procurement and Supply Services

Our Procurement, Supply and Logistics team specializes in the sourcing, coordination and delivery of goods and services to support complex projects across Angola. We are committed to providing reliable, compliant and cost-effective supply-chain solutions that enable projects to be delivered efficiently and on schedule.

We are dedicated to supporting local content development, strengthening supplier networks and ensuring seamless integration between international partners and local operations.

OUR SERVICES INCLUDE

- Compliance with ANPG local content and regulatory requirements
- Strategic procurement and sourcing of local and imported materials
- Supplier identification, pre-qualification and vendor management
- RFQ coordination, commercial evaluations and purchase order management
- Logistics planning and freight coordination (air, sea and road)
- Customs clearance and import documentation management
- Warehousing, inventory control and last-mile delivery

05 SERVICES

Renewable Energy & Cold Chain Infrastructure Installations

Renewable energy and healthcare cold chain infrastructure systems are essential to ensuring reliable service delivery, particularly in remote and underserved regions. As we face increasing demand for sustainable energy, resilient healthcare systems, and temperature-controlled storage, there is a growing need for integrated solutions that support continuous operation and efficient performance in challenging environments.

Our team delivers Cold Chain Infrastructure in Angola, including Vaccine Refrigerator Installation and Healthcare Solar Systems, positioning AMM as a trusted installation partner in Angola for healthcare and infrastructure projects. We support full medical equipment deployment and provide specialized cold chain engineering solutions tailored to local conditions.

Our team has the capacity to deploy, operate, and maintain integrated solar energy and cold chain systems that meet the needs of local communities, healthcare facilities, and infrastructure projects across Angola.

OUR SERVICES INCLUDE

- Site assessments and feasibility studies
- Solar energy system design and sizing
- Installation of solar panels and associated electrical systems
- Deployment of temperature-controlled storage equipment
- Commissioning, testing, and system optimisation
- Preventative and corrective maintenance
- Logistics, transport, and installation coordination in remote areas
- Integration of renewable energy with critical equipment and infrastructure
- Training of local operators and handover support
- Monitoring and performance tracking of installed systems
- Project planning, coordination, and stakeholder management
- Health, safety, and quality compliance during installation and operation

05 SERVICES

Concrete Waterproofing & Durability Solutions

AMM Angola is the appointed representative in Angola for Xypex crystalline waterproofing products, supplied through Xypex (UK) Ltd. Xypex waterproofs concrete from within: its active chemicals react with moisture and the by-products of cement hydration to grow insoluble crystals in the pores and capillaries of the concrete, sealing it against water and other liquids, even under high hydrostatic pressure.

Xypex products are used on water, wastewater and infrastructure projects around the world.

Because the protection becomes part of the concrete, it cannot peel or wear away like a surface membrane, and it can self-seal hairline cracks that form over time.

We specify, supply and apply Xypex solutions for water reservoirs and tanks, basements, foundations, wastewater plants and other below-ground structures, giving clients durable, low-maintenance assets built for Angola's demanding conditions.

OUR SERVICES INCLUDE

- Concrete waterproofing system design and specification
- Supply and application of crystalline waterproofing solutions
- Leak sealing and remedial waterproofing (basements, tanks, slabs, roofs)
- Protection of water-retaining and underground structures
- Technical inspections, condition assessments, and solution development
- On-site technical support and quality control
- Training and certification of applicators

— 07 PROJECTS

PROJECTS

Housing Development Supervision – Benfica

- Client: JC Andrade
- Contract Management
- Construction Monitoring
- Infrastructure Design

Mechanical Concrete Study Inspection – Angola

- Client: UK Embassy / DIT
- Feasibility Study
- Road Innovation Assessment

Geotechnical Investigation Supervision – Somalia

- Client: Private Client
- Construction Supervision
- Contractor Coordination

Culvert Infrastructure Inspection – Bengo

- Client: Government of Angola
- Quality Control
- Site Supervision
- Project Consultants

07 PROJECTS

MARQUE PROJECT

Provision of Design and Quality Assurance (QA) for Large Private Residential Development in partnership with RCE Namibia

Structural Design of residential Structures and QA Services for all Municipal Infrastructure: Stormwater, Sewer, Water and Wastewater Treatment Plant

— 07 PROJECTS

PROJECTS

Havana Relocation Section A & B in partnership with RCE

- Provision of Municipal Infrastructure (Roads, Stormwater, Water & Sewer) Windhoek, Havana Relocation Portion A; N\$ 10 million
- Provision of Municipal Infrastructure (Roads, Stormwater, Water & Sewer) Windhoek, Havana Relocation Portion B; N\$ 10 million

Provision of Ext. 3 Ongos Municipal Infrastructure in partnership with RCE

Provision of municipal infrastructure includes various key services such as water, sewer, and structural design, project supervision, quality control and assurance, water reservoir management, and bulk services.

— 07 PROJECTS

PROJECTS

The Katima Mulilo Wastewater Treatment Plant Project

Provision of Waste Water Treatment Plant and upgrading of existing Services Infrastructure – Katima Mulilo.

Gocheganas Polo Estate Design & Development

The scope of work includes the preliminary and detailed design of a bulk water network, the preliminary and detailed design of gravel roads, as well as the relocation of a 66kV NamPower powerline.

OMDis Town Transform Agency

Consultancy for Municipal Infrastructure (Roads, Stormwater, Water and Sewer) – Oranjemund.

Electrical Infrastructure to Outapi Extension 20

Consultancy Services for the Design, Documentation, Construction Supervision and Contract Administration for the Provision of Electrical Infrastructure to Outapi Extension 20.

URBAN ROADS PROJECTS

Peter Nanyemba Road Upgrading: Ongos to B1 Interchange

The services provided include structural design, road design, stormwater management, sewer and sewer pump station design, water reservoir designs, as well as project management and coordination. These components work together to ensure the successful planning, implementation, and maintenance of infrastructure projects.

Winnie Mandela Road Upgrade

Upgrade to Dual Carriageway Standards from the Intersection of Eneas Peter Nanyemba to the Traffic Circle of David Meroro in Rocky Crest.

07 PROJECTS

PROJECTS

RENEWABLE ENERGY PROJECTS

CLIENT: UNITED NATIONS

Project Management of 300 Unit installation of Solar Direct Drive

Delivery and install (and train health facility staff) over 300 of our solar direct drive (SDD) vaccine refrigeration systems across Angola.

Katima Mulilo 10MWac Solar PV

Owner's Engineer and Consulting Engineers for the Provision of Engineering and Project Management Services for the 10MWac Solar PV Plant Project in Katima Mulilo.

RESIDENTIAL PROJECTS

**Construction of House Shapwa Ya France on ERF 978**

The project is located in Auasblick, Windhoek, with a construction period of eight months. The project value is available upon request (AUR).

— 07 PROJECTS

PROJECTS

■ RESIDENTIAL PROJECTS

Alterations and additions of House Mr. & Mrs. Swarts

The project is located in Elisenheim, Windhoek, with a construction period of twelve months. The project value is N\$ 3.5 million.

Construction NAB Staff Houses at Buitepos in Omaheke Region

The project is located in Buitepos, within the Omaheke Region, with a construction period of twelve months. The project value is N\$ 11.5 million.

■ STRUCTURAL PROJECTS

Construction of Stable & Club House at Polo Estate

The project is located 35 km south of Windhoek, with a construction period of twelve months. The project value is available upon request (AUR).

Construction of Greenwood Warehouse in Walvis Bay

The project is located in Walvis Bay, Namibia, with a construction period of ten months. The project value is available upon request (AUR).

Construction of Several Multi-Storey Residential Buildings at Ongos Valley

Provision of Structural Engineering services that entitled implementing a value engineering precast slab solution from Tesik Decking.
