JOIN US ON OUR JOURNEY

At AMM Consulting, we invite you to connect with us as we strive to make a difference through engineering and management consulting. Together, we can achieve remarkable outcomes while embracing our values of community and collaboration.

Message from our Management

At AMM Angola, we believe that engineering is more than just building infrastructure — it's about shaping the future of our nation. With deep roots in Angola and a commitment to excellence, we bring together technical expertise, local insight, and international standards to deliver transformative solutions.

From roads that connect communities to systems that power progress, our work reflects our belief that Africa deserves world-class engineering led by Africans. Our mission is to raise the bar for quality, accountability, and innovation in every project we undertake. As we build for today, we're also laying the foundation for a more resilient, prosperous tomorrow.”

ABOUT US

AMM FUTURO LDA is an Angolan engineering and consulting firm dedicated to delivering impactful solutions across the continent. Our team comprises seasoned professionals with extensive experience in project management, construction supervision, engineering design, and installation. We are driven by the spirit of ubuntu, fostering inspirational relationships and personal connections in all our projects.

OUR MISSION

01.

We aim to enhance lives through innovative engineering solutions and strong partnerships.

02.

We are committed to excellence, integrity, and the empowerment of our workforce as we grow together.

03.

To deliver sustainable and innovative infrastructure solutions through integrity, expertise, and a focus on client success.

OUR VISION

01.

Our vision is to be a leader in engineering consulting across Africa, fostering sustainable practices and community development.

02.

To be the benchmark for engineering excellence in Angola and beyond and be the bridge between the communities we serve and those that make the decisions.

SECTORS

Clean Energy Services

We are leading the way in solar and wind energy implementation and helping communities transition to sustainable energy sources.

Oil & Gas Sector

Oil & Gas continue to be the main driver of world economies. Our team caters to this sector by supplying essential equipment's and services.

Mining & Resources

Together with our partners we facilitate sustainable access to Africa's resources.

Our experts cater to this sector by supplying essential equipment's and services.

SECTORS

Transportation Planning & Traffic Management

Streamlined logistics and transportation solutions that support efficient movement of goods and people.

Consulting and Project Management

Offering strategic insights and professional guidance in engineering and project management.

Construction Supervision and Health & Safety Services

Our experts design and manage engineering projects across various sectors that enhance infrastructure and utility across regions

SERVICES

Engineering, Consulting Services & Project Management

We deliver integrated engineering and design consulting services across the full project lifecycle, combining project management with multidisciplinary technical expertise. Our capabilities include infrastructure and general engineering design, geotechnical investigations and characterization, foundation and pavement design, ground improvement, and water and sanitation systems including stormwater and wastewater infrastructure.

We support projects through project planning and milestone identification, financial and budget control, programme design and management, risk assessment and mitigation, stakeholder engagement, and supply chain coordination. Our approach ensures practical, efficient, and sustainable solutions tailored to both public and private sector infrastructure developments.

Our services include:

- Roads & Highways Engineering
- Bridges & Structures Engineering
- Geotechnical Engineering
- Water & Sanitation Engineering
- Structural Engineering
- Transportation & Traffic Engineering
- Urban Infrastructure & Development
- Construction & Project Management
- Renewable Energy Engineering
- Mechanical & Electrical (M&E) Engineering
- Stormwater & Drainage Engineering
- Pavement Engineering
- Environmental Engineering

SERVICES

Our services include:

- Compliance with ANPG local content and regulatory requirements
- Strategic procurement and sourcing of local and imported materials
- Supplier identification, pre-qualification and vendor management
- RFQ coordination, commercial evaluations and purchase order management
- Logistics planning and freight coordination (air, sea and road)
- Customs clearance and import documentation management
- Warehousing, inventory control and last-mile delivery

Procurement and Supply Services

Our Procurement, Supply and Logistics team specializes in the sourcing, coordination and delivery of goods and services to support complex projects across Angola. We are committed to providing reliable, compliant and cost-effective supply-chain solutions that enable projects to be delivered efficiently and on schedule.

We are dedicated to supporting local content development, strengthening supplier networks and ensuring seamless integration between international partners and local operations.

SERVICES

Renewable Energy & Cold Chain Infrastructure Solutions

Renewable energy and healthcare cold chain infrastructure systems are essential to ensuring reliable service delivery, particularly in remote and underserved regions. As we face increasing demand for sustainable energy, resilient healthcare systems, and temperature-controlled storage, there is a growing need for integrated solutions that support continuous operation and efficient performance in challenging environments.

Our team delivers Cold Chain Infrastructure in Angola, including Vaccine Refrigerator Installation and Healthcare Solar Systems, positioning AMM as a trusted installation partner in Angola for healthcare and infrastructure projects. We support full medical equipment deployment and provide specialized cold chain engineering solutions tailored to local conditions.

Our team has the capacity to deploy, operate, and maintain integrated solar energy and cold chain systems that meet the needs of local communities, healthcare facilities, and infrastructure projects across Angola.

Our services include:

- Site assessments and feasibility studies
- Solar energy system design and sizing
- Installation of solar panels and associated electrical systems
- Deployment of temperature-controlled storage equipment
- Commissioning, testing, and system optimisation
- Preventative and corrective maintenance
- Logistics, transport, and installation coordination in remote areas
- Integration of renewable energy with critical equipment and infrastructure
- Training of local operators and handover support
- Monitoring and performance tracking of installed systems
- Project planning, coordination, and stakeholder management
- Health, safety, and quality compliance during installation and operation

SERVICES

Concrete Waterproofing & Durability Solutions

Renewable energy and healthcare cold chain infrastructure systems are essential to ensuring reliable service delivery, particularly in remote and underserved regions. As we face increasing demand for sustainable energy, resilient healthcare systems, and temperature-controlled storage, there is a growing need for integrated solutions that support continuous operation and efficient performance in challenging environments.

Our team delivers Cold Chain Infrastructure in Angola, including Vaccine Refrigerator Installation and Healthcare Solar Systems, positioning AMM as a trusted installation partner in Angola for healthcare and infrastructure projects. We support full medical equipment deployment and provide specialized cold chain engineering solutions tailored to local conditions.

Our team has the capacity to deploy, operate, and maintain integrated solar energy and cold chain systems that meet the needs of local communities, healthcare facilities, and infrastructure projects across Angola.

Our services include:

- Concrete waterproofing system design and specification
- Supply and application of crystalline waterproofing solutions
- Leak sealing and remedial waterproofing (basements, tanks, slabs, roofs)
- Protection of water-retaining and underground structures
- Technical inspections, condition assessments, and solution development
- On-site technical support and quality control
- Training and certification of applicators
